Redirection to Custom Url

Using this feature you can redirect the user to a custom page after
purchase. This way you can capture information related to the purchase at
your own end. Please note that the responsibility of redirecting the user
back to the course lies on you.

The arguments sent to you are:

name - Full Name of the user.
product_id - The id of the product
email - Email of the user
redirect_uri - URI of the url to redirect to for starting the course

Also all get arguments sent to out cart page shall also be passed on to the
thank you page

You can use the cart inside iframe or redirect to our cart url.
